

Generic Rubric For Progress 25

Assessment & Grading Module

Look at how effective you were at the beginning and end of the project using the *Beginning and End of Project Likert Scales*. Based on your progress, give yourself a grade using the criteria below. Remember, you were not expected to be proficient at the beginning or end of this project. Using skills can be challenging to master and must be practiced repeatedly across multiple situations to feel comfortable and become proficient. The key is making progress and understanding why you were successful and what you need to do to become more successful/proficient.

90 – 100 = Advanced: Above and Beyond. Since the beginning of the project, I have made significant progress in successfully using the skill.

80 – 89 = Proficient: At Standard. Since the beginning of the project, I have made good progress in using the skill successfully.

70 – 79 = Needs Improvement. I made some progress in successfully using the skill since the beginning of the project, but I could have made more.

60-69 = Needs Significant Improvement. I have made little progress in successfully using the skill since the project began. I hardly used the skill.

50 = Not Acceptable. I made no progress in using the skill since the beginning of the project. I didn't do any of the assignments or very little of them.

40= I never used the skill or didn't turn the project in.

Based on the progress I made to become more proficient using these skills, I believe I deserve the following grade:

Explain why you believe you deserve this grade.
